

Quiz

The Art of Specifying Stone

- 1 Looks like Granite, behaves like Granite, has the same strength as Granite...must be Granite. Sort of...what percentage of Quartz is required for this to be true.

A 75%

B 85%

C 95%

D 65%

- 2 What should be done to serpentine stone to prevent warping?

A should be laid with epoxy

B should be saturated with water during installation

C should be generously coated with sealant

D should be ordered warp resistant

- 3 Cross Cut (also called Fleuri Cut) is cut along the bedding plane. This cut reveals a "flowery", sometimes circular pattern. Most travertines on the market, especially in tile, are Cross Cut. With Vein Cut stone they cut _____ the bedding so the plane is revealed. This gives the stone the amazing linear pattern.

- 4 If Specimen A can scratch Specimen B, then Specimen A is harder than Specimen B. This observation is part of:

A A Scratch Test

B The Mohs Hardness Scale

C Maslow's Hierarchy of Needs

5 Polished Concrete is acid sensitive and should be specified like:

A	calcium carbonate
B	calcium silicate
C	calcium sulfate
	Other (Please Specify)

6 Sealers make stone stain-proof and waterproof

A	True	B	False
---	------	---	-------
